New York City Highlights

by Flavio Perez

Living in New York City introduces us to the many points of interest the city has to offer. New York City is made up of five boroughs: Manhattan, Brooklyn, Queens, Staten Island, and the Bronx. For this Spring 2022 Edition of the newsletter, we will be looking at the Brooklyn Bridge.

Located in southern Manhattan, the bridge starts at the borough and goes across the East River to Brooklyn. To get there, one will have to take the MTA subway 6 train to the last stop in Manhattan: Brooklyn Bridge-City Hall. My trip to the bridge was on a windy sunny day in March to capture some photographs for my photography class. People can walk across the bridge through the middle pathway with two-way traffic, one going to Brooklyn and the other to Manhattan.

When walking through the bridge, on the left side one can see the Manhattan Bridge which also is another bridge people can walk through. I managed to take several photographs along the way. When you make it across to Brooklyn and off the bridge, you will notice that you will be near the Brooklyn Bridge and the Down Under the Manhattan Bridge Overpass (DUMBO) with an amazing sight overlooking Manhattan. A trip is recommended to those feeling adventurous on a warm nice day for sightseeing.
