CCNY Navigate Notifications for Faculty

Notifications are the central component of the coordinated care feature of the CCNY Navigate platform.

When a faculty member issues a notification, not only is the student informed but the academic advising community is also provided with the information. Notifications can provide students with a call to action and/or provide information regarding available resources. Since academic advisors are also alerted of the concern, a coordinated response is possible.

Notifications can also be used to let students know that they are doing well in your class.

This document lists the available notifications, explains when to use each one, and provides the workflow and communication triggered by each. Please see the document, CCNY Navigate – How to Work With Notifications for Instructors, for guidance about how to issue and view notifications.

Please note that there are certain notification reasons that are designed to be used with Progress Report Campaigns. These reasons all start with *PRC. Faculty members should use these notification reasons when responding to Progress Report Campaigns.
