ABOUT THE CONFERENCE

The UN Universal Declaration of Human Rights celebrated its 70th birthday on December 10, 2018. Since that statement of principles following the mass atrocities of WWII, the world has witnessed the spread of human rights discourse, norms, law, and institutions at both the domestic and international levels. Eleanor Roosevelt’s prediction that “a curious grapevine” would spread the ideas articulated in that 1948 General Assembly document seems to have come to fruition. Nevertheless, the aspirations of the Declaration remain far from fulfilled, as grave violations of rights continue to be perpetrated around the globe, often with impunity. Economic inequality, racism, sexism, and multiple refugee crises have engendered and exacerbated the rise of political extremism. Addressing such issues, as well as many others, CCNY’s Critical Perspectives on Human Rights Conference aims to explore the contested legacy of human rights in increasingly uncertain times. It seeks to foster dialogue and scholarship from a wide range of perspectives. Some conference presenters are scholars and activists who continue to view the human rights project as a moral and ethical challenge to power; others see it as an enabler of political and economic domination. The Critical Perspectives on Human Rights Conference participants gather to reassess the origins, foundations, and contemporary forms of human rights discourse, ideas, and practice today, seventy years on.

The Second Critical Perspectives on Human Rights Conference includes scholars and activists with institutional affiliations from nearly twenty countries: Belgium, Canada, Czech Republic, Georgia, Germany, Greece, Hungary, India, Indonesia, the Netherlands, New Zealand, Nigeria, Norway, Pakistan, Portugal, Spain, South Africa, the United Kingdom, and the United States.

The Critical Perspectives on Human Rights Conference is part of a larger initiative at The City College of New York, CUNY—shared among the Colin Powell School for Civic and Global Leadership, the Division of Interdisciplinary Studies, the Division of Humanities and the Arts, and the President’s Office—dedicated to human rights studies, public programming, and scholarship.

THE INTERNATIONAL CRIMINAL COURT AT 20: WHAT NEXT FOR INTERNATIONAL CRIMINAL JUSTICE?

Time: 12:00-1:30pm

Room: Auditorium

Register here for Zoom link: <https://bit.ly/3wQvrUB>

Since its establishment at the turn of the century, a central preoccupation of the International Criminal Court (ICC) has been to catalyze—through the principle of complementarity—the pursuit of criminal accountability at the domestic level. This roundtable discussion will explore what impact the ICC, now operational for twenty years, has had in certain countries, how its interventions have evolved over time, and what challenges it has faced. Participants will also consider broader questions about the future of accountability for atrocity crimes in both international law and politics. Where does international criminal justice today stand as a field and a practice? How should we be thinking about the future of the field? And what role should the ICC play—or not play—in the next twenty years?

Focusing on strategic litigation, advocacy, and capacity building, her work experience includes training prosecutors and investigators to enhance domestic capacity to tackle international crimes, as well as working on universal jurisdiction and precedent-setting cases before South African courts, including enforcing the ICC arrest warrant of the former president of Sudan during his visit to South Africa.

Her path-breaking book, *Transitional Justice*, examines the twentieth century transitions to democracy in many countries. Born in Argentina, Professor Teitel's interest in the topic grew out of the dilemmas confronting that society in the transition out of junta rule. The book explores the recurring question of how new regimes should respond to past repression. Professor Teitel has also written *Globalizing Transitional Justice*, which provides observations and insights on how the practice and discourse of transitional justice has been evolving, especially in relation to the rise of international criminal law and the increasing centrality of international human rights. ABOUT THE CITY COLLEGE OF NEW YORK

The City College of New York was founded by Townsend Harris in 1847 as the Free Academy of the City of New York. It is the first public institution of higher education in New York City and the precursor to CUNY. At a time when higher education in America was limited to children of the wealthy and privileged, CCNY was established to provide children of immigrants and the poor access to free higher education based on academic merit alone. Dr. Horace Webster, its first president, described the college as an experiment dedicated to educating “the children of the whole people.” This has remained CCNY’s unwavering mission ever since. Now, in our 170th year, the City College of New York continues to offer an ideal learning opportunity for students, providing an affordable world class education in a wide variety of disciplines. Today, more than 15,000 students pursue undergraduate and graduate degrees in the College of Liberal Arts and Science; Bernard and Anne Spitzer School of Architecture; School of Education; Grove School of Engineering; Sophie Davis Biomedical Education/CUNY School of Medicine; and the Colin Powell School for Civic and Global Leadership. Spitzer, Grove and Sophie Davis/ CUNY School of Medicine are the only such public schools in New York City. Bolstered by an outstanding faculty whose research and scholarship is widely applauded, access to excellence remains CCNY’s vision. U.S. News & World Report, Princeton Review and Forbes all rank City College among the best colleges and universities in the United States. In its 2016 rankings, U.S. News placed CCNY among the nation’s “Most Ethnically Diverse” institutions. Other accolades come from the Center for World University Rankings that has listed CCNY “one of the world’s best institutions of higher education,” and the American Institute of Physics as a, “a top producer of physics graduates in the nation.”

City College's distinguished alumni include ten Nobel Laureates with the most recent winner being neuroscientist John O'Keefe, Class of 1963, in 2014. Originally situated at 23rd St. and Lexington Ave. in lower Manhattan, CCNY moved uptown, to its now landmarked neo-Gothic campus in Harlem, in 1907. The college is currently led by Dr. Vince Boudreau, a dedicated member of the campus community for more than 25 years, and the founding dean of the Colin Powell School.

THE PATAI PROGRAM

THE FRANCES S. PATAI PROGRAM

IN HOLOCAUST, GENOCIDE,
AND HUMAN RIGHTS STUDIES

The Frances S. Patai Program in Holocaust, Genocide, and Human Rights Studies Among the most unique aspects of the Center for Worker Education is its commitment to supporting a diversity of profound, yet topical, educational opportunities. One such example of this commitment is its Frances S. Patai Program in Holocaust, Genocide, and Human Rights Studies. The Patai Program at CWE supports courses, conferences, and symposia, as well as public lectures, lectureships, and an annual student essay competition—all dedicated to the lasting and transformative lessons of Holocaust, Genocide, and Human Rights Studies. In addition to being one of the first female graduates of City College, Mrs. Patai was a strong supporter of providing educational opportunities to those people who would otherwise possibly not have access to a formal university education. With this in mind, Mrs. Patai bequeathed a generous donation to CWE that allowed for the creation of a program that now bears her name. Mrs. Patai was motivated by three aims when she gave her support. First, she wanted to keep alive the memory of those volunteers who joined the Abraham Lincoln Battalion to fight against fascism in the Spanish Civil War. Second, she wanted to make sure that students did not forget the Holocaust. She believed that education was an important way to prevent the reoccurrence of genocide. Third, she supported programs that encouraged students to use their knowledge as a springboard for exploring other mass atrocities, including both the realities of contemporary genocide and the ongoing global struggle for human rights.
