	2017 Cohort	55%
	2016 Cohort	59%

1 Year Retention Rates	2023 Cohort	79%
	2022 Cohort	79%
	2021 Cohort	75%

Announcements

Explore CCNY Insights
Over the past 18 months, the Office of Institutional Research has been hard at work building a series of Tableau dashboards to provide commonly requested data points. CCNY Insights makes data on student demographics, retention and graduation rates, class size, and grade distributions easy to find. The site also includes data on detailed enrollment credits (DEC) and student survey results. Best of all, most of data can be disaggregated by school/division. Please take some time to explore this wealth of information. If you still need access, please complete this form.

2025-27 City College Middle States Self-Study launches
City College has been accredited by the Middle States Commission on Higher Education (MSCHE) since 1921. Our latest Self-Study officially kicked off on September 15th. Working Groups are now busy collecting evidence for their inquiry and analysis. Over the next several weeks, they may reach out to request information or materials from your unit. You can find more details about the Self-Study process on the College's new accreditation website.

Helping City College rank among the nation's best
The Office of Institutional Research reports data to several external ranking agencies such as US News & World Report, The Princeton Review, and College Board. High rankings are an important marketing and fundraising tool. Just last month, US News ranked the College #9 in Top Performers on Social Mobility, a traditional forte of the institution. Click here to read more about how U.S. News ranks schools. Over 15 offices provide data that OIR needs to complete the external surveys related to these rankings. If you received an email from noreply@qemailserver.com, we have identified several external survey questions we need your assistance in answering. Please respond as soon as possible. The data collection period will run until the end of the fall term in December.

Look out for our new data request form
Thanks to the amazing partnership of our colleagues in the Office of Information Technology, Institutional Research is launching a new data request form. The new form will be tied directly to the self-service portal (SYSAID), helping both offices meet your data needs more effectively and efficiently. When a request is submitted, IT and IR will see it simultaneously and make sure the appropriate team responds ASAP. Keep a look out for the formal launch of this new and exciting tool on CCN's new intranet.

[1] Data represent initial fall enrollment counts as 9/15/2025. School/Division is based on students' active academic plan as of the fall census. Students with multiple majors are counted only in the first academic plan. Percent values are based on the column total.
