

City Facts Fall 2005 - 2014

Student Demographics

PREFACE

CITY FACTS 2014 describes CCNY student demographics. It is an annual publication of the Institutional Research Office (IR). This edition, unlike previous ones, has a decade of information for each of its twenty eight tables.

Student Data: The Past Decade

Here are Fall semester enrollment trends and other student data. Total student data comes first followed by undergraduate, graduate - Masters and Engineering Ph.D. students; The CUNY Grad Center gets credit for our other PHD students.

Notes

Context-specific references are cited in each table and graph in CITY FACTS. Sources give details on how CUNY treats statistical enrollment and course data.

Data Sources and Interpretation of Statistical Tables

ACKNOWLEDGMENTS

Thanks to the people who make City Facts possible:

Ariel Cohn, Manager of Information Systems in the CUNY Office of Institutional Research & Analysis [OIRA] and a CUNYFIRST guru. If she had not created the CUNY Institutional Research Data Base [IRDB] City Facts would be impossible to create it in CCNY's one person Institutional Research Office.

The CUNY Office of Institutional Research & Analysis [OIRA] staff for their help with my questions.

Rodel Sena, Director of Application Development Services for his help, patience and for guiding me through the CUNYFIRST SQL tables. And for being there for me.

The CCNY people who taught me what appears to be, isn't.

Ed Silverman, Director
Institutional Research Office
November 2015

TABLE OF CONTENTS

Preface

Acknowledgments

Data Sources and Interpretation of the Statistical Tables

CITY FACTS information comes from several different sources*:

A: The Show Data comes from information in the CUNY OIRA Institutional Research Data Base [IRDB] and from the CUNYFIRST Data Base. The data represents the College's enrollment at the end of the third week of each semester and is a "fixed" or "frozen" data file. [This time was established by the federal government as the official time for all institutions of higher education for their reporting. It was done to make comparisons possible.] It is used by the City University of New York (CUNY) Central Office's official enrollment statistical source in preparing reports for the New York State Education Department (NYSED), the National Center for Education Statistics (NCES), the Integrated Postsecondary Education Data System (IPEDS) as well as reports for other government agencies. CUNY's statistical treatment of enrollment and course data for the Show Data follows:

1) Students who registered, but withdrew prior to the end of the third week in the semester are excluded. Changes made by Records and Registration after the third week, are not reflected in these tables.

2) Permit students, (i.e., students who are taking classes at CCNY), but are getting their degrees from another CUNY college, are included in the computation of full-time equivalent (FTE – see Technical Note "**FTE calculation**") students and are included in the CCNY enrollment head count. CUNY credits them to their home college. Thus their number differs from those in City Facts.

3) CUNY BA students are handled the same way as Permit students.

4) Class standing is based on total cumulative credits earned prior to the present semester. This creates the following groups of students:

Freshmen	0-30
Sophomores	31-60
Juniors	61-90
Seniors	91-120+
Graduate	0-36+

Non-degree students are put into three groups: Lower, Upper and Graduate. They are in the head count.

5) When the degree indicator is missing, the student is classified as non-degree.

6) When full- or part-time status is missing, the student is classified as part-time.

7) When the degree indicator shows the student is enrolled in a degree program, but class level is missing, the student is classified as a freshman.

8) Credits generated by undergraduate students in graduate courses are counted as graduate level credits in the calculation of student FTEs (– see Technical Note "**FTE calculation**") and, conversely, credits generated by graduate students in undergraduate courses are counted as undergraduate credits.

9) Non-Resident Aliens: According to the field definitions for the Show Data, there are two categories of Foreign Citizens and Non-Resident Aliens. Both of them are included in the Non-Resident Alien category in the IPEDS reports:

A Foreign Resident who pays non-resident tuition and is not eligible for TAP. (Includes any foreign student who has lived in New York for one year and/or has not been a permanent resident [green card holder] or applied for permanent residency at least one year prior to the start of the semester.)

A Foreign Resident who pays resident tuition and is not eligible for TAP. (For example, United Nations Personnel, Temporary Resident, Permanent Resident Pending or Refugee Pending).

10) The ethnicity information in City Facts uses the CUNY OIRA Institutional Research Data Base's data. Many students do not report their ethnicity, but for a number of reasons it is important to have reasonably accurate information of the actual number of students in each ethnicity category. To this end, CUNY OIRA uses a federally approved algorithm to impute ethnicity for students with missing ethnicity information. For example, supposed we have six ethnicity categories (Asian, Black, Hispanic, Native American, White, Foreign) and no information about X's ethnicity. Guessing at X's ethnicity at random carries a 16.67% probability of arriving at her actual ethnicity. Using the CUNY OIRA's algorithm based on name, address, high school and other known information, there is a 75% probability of arriving at X's actual ethnicity. For large enough groups, the numbers of students in each ethnicity category come close to the actual numbers because errors cancel each other out to a large extent.

Sources: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS) Graduation Rates and Institutional Characteristics components

The CUNY Office of Institutional Research and Analysis (OIRA) Since multiple admissions started in Fall 2002, this data comes from the IRDB.

Integrated Postsecondary Education Data System (IPEDS) A U.S. Department of Education database collected by the U.S. Department of Commerce, Bureau of the Census, for the National Center for Education Statistics (NCES).

According to IPEDS:

A Non-Resident Alien is a person who is not a citizen or national of the United States who is in this country on a temporary basis, and does not have the right to remain indefinitely.

Resident Aliens who are not citizens or nationals of the United States who have alien registration receipt cards (Form

I-551/I55), and who have been lawfully admitted for permanent residence are to be reported in the appropriate racial/ethnic categories along with United States citizens. (See "A: The Show Data Non-Resident Aliens" above.)

To see the complete terms and definitions used by IPEDS go to: <http://nces.ed.gov/ipeds/glossary/>

THE CHRONICLE OF HIGHER EDUCATION Web Page (<http://chronicle.merit.edu>)

Technical Note

Level by Credits

LOWER DIVISION

Freshmen:

Lower 0-15

Upper 16-30

Sophomores:

Lower 31-46

Upper 47-60

UPPER Division

Juniors:

Lower 61-75

Upper 76-90

Seniors:

Lower 91-106

Upper 107 or more

FTE calculation

FTE's are calculated by dividing total credits by 15 for Undergraduates and by 12 for Graduate students.

One student taking 15 credits = 1 FTE.

One 3-credit course with 10 students has a sum of 30 credits. Divide 30 by 15 to get 2 FTEs.

CUNY's statistical treatment of enrollment and course data for the Show Data follows:

1) Students who registered, but withdrew prior to the end of the third week in the semester are excluded. Changes made by Records and Registration after the third week, are not reflected in these tables.

2) Permit students, (i.e., students who are taking classes at CCNY), but are getting their degrees from another CUNY college, are included in the computation of full-time equivalent (FTE – see Technical Note "**FTE calculation**") students and are included in the CCNY enrollment head count. CUNY credits them to their home college. Thus their number differs from those in City Facts.

3) CUNY BA students are handled the same way as Permit students.

4) Class standing is based on total cumulative credits earned prior to the present semester. This creates the following groups of students:

Freshmen	0-30
Sophomores	31-60
Juniors	61-90
Seniors	91-120+
Graduate	0-36+

Non-degree students are put into three groups: Lower, Upper and Graduate. They are in the head count.

5) When the degree indicator is missing, the student is classified as non-degree.

6) When full- or part-time status is missing, the student is classified as part-time.

7) When the degree indicator shows the student is enrolled in a degree program, but class level is missing, the student is classified as a freshman.

8) Credits generated by undergraduate students in graduate courses are counted as graduate level credits in the calculation of student FTEs (– see Technical Note "**FTE calculation**") and, conversely, credits generated by graduate students in undergraduate courses are counted as undergraduate credits.

9) Non-Resident Aliens: According to the field definitions for the Show Data, there are two categories of Foreign Citizens and Non-Resident Aliens. Both of them are included in the Non-Resident Alien category in the IPEDS reports:

A Foreign Resident who pays non-resident tuition and is not eligible for TAP. (Includes any foreign student who has lived in New York for one year and/or has not been a permanent resident [green card holder] or applied for permanent residency at least one year prior to the start of the semester.)

A Foreign Resident who pays resident tuition and is not eligible for TAP. (For example, United Nations Personnel, Temporary Resident, Permanent Resident Pending or Refugee Pending).

10) The ethnicity information in City Facts uses the CUNY OIRA Institutional Research Data Base's data. Many students do not report their ethnicity, but for a number of reasons it is important to have reasonably accurate information of the actual number of students in each ethnicity category. To this end, CUNY OIRA uses a federally approved algorithm to impute ethnicity for students with missing ethnicity information. For example, supposed we have six ethnicity categories (Asian, Black, Hispanic, Native American, White, Foreign) and no information about X's ethnicity. Guessing at X's ethnicity at random carries a 16.67% probability of arriving at her actual ethnicity. Using the CUNY OIRA's algorithm based on name, address, high school and other known information, there is a 75% probability of arriving at X's actual ethnicity. For large enough groups, the numbers of students in each ethnicity category come close to the actual numbers because errors cancel each other out to a large extent.

Sources: U.S. Department of Education, National Center for Education Statistics, Integrated Postsecondary Education Data System (IPEDS) Graduation Rates and Institutional Characteristics components

The CUNY Office of Institutional Research and Analysis (OIRA) Since multiple admissions started in Fall 2002, this data comes from the IRDB.

Integrated Postsecondary Education Data System (IPEDS) A U.S. Department of Education database collected by the U.S. Department of Commerce, Bureau of the Census, for the National Center for Education Statistics (NCES).

According to IPEDS:

A Non-Resident Alien is a person who is not a citizen or national of the United States who is in this country on a temporary basis, and does not have the right to remain indefinitely.

Resident Aliens who are not citizens or nationals of the United States who have alien registration receipt cards (Form

I-551/I55), and who have been lawfully admitted for permanent residence are to be reported in the appropriate racial/ethnic categories along with United States citizens. (See "A: The Show Data Non-Resident Aliens" above.)

THE CHRONICLE OF HIGHER EDUCATION Web Page (<http://chronicle.merit.edu>)

Technical Note

Level by Credits

LOWER DIVISION

Freshmen:

Lower 0-15

Upper 16-30

Sophomores:

Lower 31-46

Upper 47-60

UPPER Division

Juniors:

Lower 61-75

Upper 76-90

Seniors:

Lower 91-106

Upper 107 or more

FTE calculation

FTE's are calculated by dividing total credits by 15 for Undergraduates and by 12 for Graduate students.

One student taking 15 credits = 1 FTE.

One 3-credit course with 10 students has a sum of 30 credits. Divide 30 by 15 to get 2 FTEs.
