Project and Thesis Information
M.S., Computer Science

Project

For the final requirement of the M.S., students may complete a three-credit project under the supervision of a faculty member. The project should be completed in the student’s final semester. To sign up for a project, the following steps must be taken:

1. Approach a faculty member to discuss a topic for the project and obtain the faculty member’s approval.
2. Complete the below project permission form describing your project, and have the faculty member sign it.
3. Submit the form to Ms. Sawyer for the department chair’s approval.
4. You will be notified whether the chair approves of the project and, if approved, the department will subsequently give you permission to register the course.

Thesis

For the final requirement of the M.S., students may complete a six-credit thesis under the supervision of a faculty member. Most students complete the thesis over two semesters and therefore it should be started in the semester prior to the student’s final semester. To sign up for a thesis, the following steps must be taken:

1. Approach a faculty member to discuss a topic for the thesis and obtain the faculty member’s approval.
2. Complete the below thesis permission form describing your project, and have the faculty member sign it.
3. Submit the form to Ms. Sawyer for the department chair’s approval.
4. You will be notified whether the chair approves of the thesis and, if approved, the department will subsequently give you permission to register the course.
Permission Form for CSC I9800

To: CS Department

Re: CSC I9800 “Project Registration”

The following graduate student ___________________________________________________, EmplID/ CUNYFirstID: _________________________ has been given permission to register for CSC I9800 “Project” for the Spring_____ Fall ______ semester.

The advisor is Prof. ______________________________, and the project title is ______________________________________________. A description of the project, clearly stating what new element is expected.

Advisor’s Signature ______________________________________ Date_________________

Student’s Email ______________________________________
