STUDENT TEACHING: POST-OBSERVATION SELF-REFLECTION FORM

Student Teacher’s Name (Last, First): __________________________ Program: __________
Date of Obs.: ___________ Class/Grade: _____________ School: ______________________
Aim (Objective, Goal) of Lesson/Activity: __________________________________________
______________________________________________________________ Form # ________

Directions: Please complete this form based upon your reflections after you have discussed this
lesson/activity with your college supervisor and/or cooperating teacher. Email the completed form (in Word)
to your supervisor and Dr. Billig (bbillig@ccny.cuny.edu) within (approximately 48 hours) of the observation.
You will also upload your responses in the form that is below the Observation Report in your
TASKSTREAM account.

1. Did this lesson unfold as you (and/or your supervisor or cooperating teacher) had planned? If not,
what changed and why? If yes, what was the # 1 aspect of the lesson that went well?

2. Did the students learn what you had intended them to learn? How did (or will) you know? Refer to
any data or students’ work that helped (or will help) you to determine your students’ progress.
Comment on how this lesson connected with the Unit and/or any ongoing projects.

3. Briefly describe (include evidence) the extent of your students’ engagement (and/or your classroom
management) during the lesson. If you were not satisfied, what could you have done differently to
improve upon their engagement (and/or your classroom management)?

4. If you could teach this lesson again to the same group of students, what changes would you make and
why? (Example: Did you account for students’ individual learning styles, special needs, ELL’s
needs, use of technology, cultural relevance, etc.)

5. Based upon your reflections (after the post-observation conference with your supervisor and/or
cooperating teacher), what have you learned about your teaching strengths and weaknesses? What
are some next steps that you could take before your next observation that could strengthen any of
your teaching skills?

[Please attach additional pages for your responses, as needed.]
