OFFICE OF THE PRESIDENT

December 16, 2010

Dr. and Mrs. Andrew S. Grove  
171 Main Street #278  
Los Altos, CA 94022

Dear Andy and Eva,

It was wonderful to meet you last month and I was thrilled to hear from Shelly that you are planning to accelerate your commitment to the Grove School of Engineering of The City College of New York. You have my personal assurance that we will spend no more than \$2 million per year, with these funds allocated:

- 1/3 for scholarships for outstanding students,
- 1/3 for recruitment of outstanding and "rising star" faculty, and
- 1/3 for infrastructure and equipment related needs

Half of each category, on average, will be focused on building our capacity in the Chemical Engineering and Biomedical Engineering departments. Given the resources they need, this level of support will ensure that our leading disciplines will continue to flourish. If this description reflects your priorities, I ask that you sign below and return this agreement to us for our records.

We will maintain the Dean's commitment to report on an annual basis; I understand that Dean Barba will have an annual report ready for you shortly and I look forward to sharing it with you and to seeing you both again this spring.

Thank you for believing in the promise of CCNY. Please know that you have our deepest gratitude for creating new possibilities and setting expectations here ever higher.

With warmest regards to you both for a wonderful New Year,

Lisa Staiano-Coico  
President

Andrew S. Grove
