was nerve rattling. I was supposed to help Professor Hitzelbach, the editor in chief, in the discussion with the rest of the board. Despite the strong urge to avoid this public role, I was able to participate and help in making decisions. It was not easy for me because I was through a system that did not allow students to have a friendly contact with teachers/professors. In fact, after a few years (for less than three) one understood one was not supposed to voice opinions either. I have been shedding these obvious traumas ever since. I came to the USA. My experience at City College has been wonderful in that and many other ways.

Program at the University of North Carolina.

A Journal Excerpt
Every semester, the Fellowship Program invites faculty members to pursue a topic in a variety of different areas.

The following is an excerpt taken from Juan Alkidy's journal concerning Professor Rosenfelt's talk. The speaker for the April 26 Forum was Dr. Margaret Rosario from the CCNY Psychology Department.

From her talk, I gained an understanding of the complexity involved in finding causes for given phenomena. She taught that although there may be statistical correlation between two things, that does not imply a causal relationship between the two. I thought that was very valuable in seeking to understand the nature of historical events. The rigor and intelligence required to discover causal relations between phenomena is greater than I thought.

Juan goes on to comment: Another lesson has been that the academic world is not one where each member stands alone, but one in which all members function as a community, as a whole.

GRE PREP COURSE
If you plan to take the GRE this fall, you should definitely take the GRE prep course. There are still seats available for the fall session. For those interested, the first few dates are September if you are interested in attending. (The Fellowship Program covers the cost of the course.)

SENIOR SEMINAR, SPRING 2003
Professor Nicholas Rappas (Philosophy) has agreed to teach the fellowship seminar next spring and is still looking for a co-teacher as well as a topic.

At the suggestion of Professor Rosenfelt, the requirement for the Senior Seminar is changing. It will no longer be a required course for seniors but a required course for incoming Fellows. It will continue to be taught once a year in the spring semester.

So, for the next two years, all seniors who have not already taken the senior are required to take it, current Fellows who are not yet seniors may take the seminar whenever they like (assuming they are a senior, with priority given to those with the most credit). By the spring of 2006, all incoming Fellows will be required to take the seminar. Fellows may take the fellowship seminar a second time if there is room.
