

The City College
of New York

Information Security Training Workshops Schedule

WHEN Tuesdays • April 14- May 26 • 12pm- 2pm

WHERE Tech Center • NAC 1/301 • STC-3

WHO Faculty, staff, students are welcome

Information technology devices are used to relay most of the personal and professional transactions you conduct every day. But how secure and confidential are they really? This workshop provides a step-by-step overview of how information technology works. It illuminates security vulnerabilities while offering useful tips and resources to help minimize the risk of becoming a victim of cyber-crime while also explaining measures you can use to protect the information resources -- both personal and professional -- entrusted to you.

Information Technology Security Workshop topics

- CUNY Information Security policy overview
- What is Non-Public University Information (NPUI)?
- How to E.L.U.D.E. information security threats, especially identity theft
- How to use passwords more effectively
- The importance of updates and upgrades
- Understanding encryption basics for data storage and transmission
- CUNY/ CCNY Information Security resources.

For more information, please contact the CCNY Information Security Office.
